Investment update - October

A rise in COVID-19 cases during October resulted in the re-introduction of widespread restrictions across Europe, leading to a fall in world equity markets towards the end of the month. Investor sentiment had remained relatively neutral throughout the majority of October as the US presidential election dominated headlines and Boris Johnson missed his self-imposed Brexit deadline as the impasse continues.

Our Investment Committee remain confident with the make-up of the strategy, therefore no changes were made during October. The total allocation to global stockmarkets across our strategies remain at broadly neutral levels, with around 80% of equity exposure lying outside of the UK where we believe greater longer-term opportunities exist. Our fixed income positioning continues to target high quality, investment grade corporate bonds, which offer prospects for attractive income and capital growth. The absolute return funds that make up the alternatives sector of the strategy should continue to act as market stabilisers.

The ongoing uncertainty and impact of COVID-19 means our Investment Committee continues to closely monitor current events and will modify the strategies' positioning, including utilising our additional cash weightings, if new buying opportunities arise.

Discretionary Managed Portfolio Service

The service consists of six actively managed investment models, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment models are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another.

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

Risk profile

The model is managed in accordance with Dynamic Planner risk profile 3 (Low), with the model's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Discrete performance

	YTD	2019	2018	2017	2016
RHIM Strategic	-5.4%	6.9%	-2.9%	3.3%	2.0%

About Richmond House

We launched our discretionary management service in 2006, and have navigated the portfolios through good times and bad. We're proud to say that we've protected our clients' capital and today we have around £200 million of funds under management.

We focus on both actively managed funds and lower cost passive funds where appropriate, taking a sensible approach and always maintaining our awareness of downside risks. Adopting a global view, we continually identify where the risks and opportunities lie.

We offer a range of model portfolios, and the discretionary powers of our specialist team allow us to make alterations to these quickly and efficiently. Each portfolio typically holds between 25 and 30 funds selected from the whole of the market, ensuring diversification across asset classes, countries and sectors.

We conduct our own fund research using specialist tools such as Morningstar, but we also take the opportunity to meet fund managers regularly face-to-face to ensure each fund continues to meet its objectives and remains appropriate to our clients' needs.

Headline asset allocation and positioning

Summary of current Investment Committee positioning

	UW (-)	N (=)	OW (+)	Key
Fixed interest		Current		■ Current
Equities		Current		■ Previous*
Property	Current			UW (-) Underweight
Alternative investments		Current		N (=) Neutral
Cash		Current	Previous*	OW (+) Overweight

- Equity exposure remains around neutral, with approximately 80% of our stockmarket exposure outside of the UK.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels remain at neutral.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.

*Positioning prior to last Investment Committee meeting
