Ongoing charges figure ('OCF')	0.46%
Annual yield (current)	1.76%

\*Not including platform fees  
Source: FE Analytics as at 30.11.20.

#### Investment update - November

World equity markets had one of the best months on record since 1989 in November, rallying on the back of the news of effective vaccines against COVID-19 and the possibility of vaccine roll outs in the near future. This, much needed, positive news was preceded by Joe Biden's US presidential election, which was also viewed favourably by markets.

The 'Goldilocks' outcome of a potentially divided Senate / House of Representatives and avoidance of a 'Blue Wave' was viewed as the best outcome from a market perspective, in part because it seemingly makes significant tax increases and reforms of 'big tech' and sectors such as healthcare less likely. No changes were made to the strategy in November. The total allocation to global stockmarkets remains unchanged, with around 80% of equity exposure lying outside of the UK where we believe greater longer-term opportunities exist.

Our Investment Committee continue to closely monitor current events and are actively looking at economic areas and themes that will now be best placed to capitalise from the recent global policy shifts in Europe (European Green Deal), China (carbon neutral by 2060) and the US (Biden's presidential election victory – renewables and infrastructure).

#### Discretionary Managed Portfolio Service

The service consists of six actively managed investment models, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment models are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another.

#### Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

#### Risk profile

The model is managed in accordance with Dynamic Planner risk profile 6 (High Medium), with the model's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

#### Discrete performance

	YTD	2019	2018	2017	2016
RHIM Dynamic	2.3%	13.4%	-5.9%	9.2%	4.6%
ARC Steady Growth PCI	2.3%	15.0%	-5.6%	9.4%	14.0%
CPI	0.6%	1.3%	2.1%	2.9%	2.1%

#### Cumulative performance

	1yr	3yr	5yr	10yr
RHIM Dynamic	5.3%	10.0%	25.1%	180.8%

RHIM performance is net of fund charges, but does not include RHIM discretionary management fees, nor fees that may be incurred through your financial adviser. Highlighted ARC PCI figure is provisional.

#### Inception performance

Source: FE Analytics and Morningstar as at 30.11.20. Inception from 01.01.06.

RHIM performance is net of fund charges, but does not include RHIM discretionary management fees, nor fees that may be incurred through your financial adviser. Highlighted ARC PCI figure is provisional.

Past performance is not a guide to future results. See full risk warning overleaf.

## About Richmond House

We launched our discretionary management service in 2006, and have navigated the portfolios through good times and bad. We're proud to say that we've protected our clients' capital and today we have around £200 million of funds under management.

We focus on both actively managed funds and lower cost passive funds where appropriate, taking a sensible approach and always maintaining our awareness of downside risks. Adopting a global view, we continually identify where the risks and opportunities lie.

We offer a range of model portfolios, and the discretionary powers of our specialist team allow us to make alterations to these quickly and efficiently. Each portfolio typically holds between 25 and 30 funds selected from the whole of the market, ensuring diversification across asset classes, countries and sectors.

We conduct our own fund research using specialist tools such as Morningstar, but we also take the opportunity to meet fund managers regularly face-to-face to ensure each fund continues to meet its objectives and remains appropriate to our clients' needs.

## Headline asset allocation and positioning

Summary of current Investment Committee positioning

	UW (-)	N (=)	OW (+)	Key
Fixed interest				■ Current
Equities				■ Previous*
Property				UW (-) Underweight
Alternative investments				N (=) Neutral
Cash				OW (+) Overweight

- Equity exposure remains around neutral, with approximately 80% of our stockmarket exposure outside of the UK.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels remain at neutral.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
